Subject: Equitable Growth Profile of Long Beach Report

On November 7, 2017, the City Council directed the City Manager, through the Office of Equity, to identify a philanthropic or educational partner to conduct an economic equity study for the City (Attachment A). The item highlighted PolicyLink “All In Cities” initiative as a model for the profile. With this direction, as indicated in progress updates to the Mayor and City Council dated April 24, 2018 (Attachment B) and June 29, 2018 (Attachment C), PolicyLink and the Program on Environmental and Regional Equity at USC (PERE) were selected to develop the report. Citi Community Development provided funding directly to PolicyLink for the development of the report.

Throughout the course of the project, PolicyLink provided the City with updates and opportunities to contribute sources of information such as the Early Childhood Education Strategic Plan and the Everyone In Listening Tour summary. The information included in the Equitable Growth Profile was drawn from the National Equity Atlas indicators database, a resource developed by PolicyLink and PERE. The database incorporates data from public and private data sources such as the U.S. Census Bureau, the U.S. Bureau of Labor Statistics, and Woods & Poole Economics, Inc., and provides equity indicators disaggregated by race and ethnicity as well as gender, nativity, education, and income.

In addition to the data analysis contained in the Equitable Growth Profile, a summary report draws upon insights and personal opinions that were shared during more than 20 interviews conducted with local community residents and leaders. Their comments helped shape certain policy recommendations and statements included in the summary of the report, which is different from the data presented.

The research and report were conducted by PolicyLink and PERE and reflect the opinions and recommendations stemming from the data and interviews with community members. These were not approved by the City of Long Beach and are not to be considered recommendations and statements from the City of Long Beach. The report was released on February 5, 2019 at an event at Long Beach City College. The full report and summary can be downloaded from the PolicyLink website: http://www.policylink.org/resources-tools/long-beach-equity-profile.

Councilmember Jeannine Pearce, Second District
Councilmember Roberto Uranga, Seventh District

Subject: Economic Equity Profile Study

RECOMMENDATION:

Respectfully request the City Manager to work with the Office of Equity to identify a philanthropic or educational partner to conduct an economic equity study on the City of Long Beach, and report back in 60 days.

Discussion

To plan for more economically equitable regions, communities first need to know where they stand in terms of equity. To assist communities with that process, philanthropic organizations and funders conduct studies to identify and measure various equity indicators that prevent economic vitality.

For example, PolicyLink’s “All In Cities” initiative produces equity profiles in partnership with leaders around the country working toward building equitable and sustainable economies. Each equity profile presents demographic trends and assesses how well regions are doing to ensure its diverse residents can participate in the region’s economic vitality, contribute to the readiness of the workforce, and connect to the region’s assets and opportunities. Once the data is collected, PolicyLink works with city leaders to advance equitable growth strategies designed to achieve measurable progress on economic inclusion.

There is a growing body of research that finds that greater economic opportunity fosters stronger economic growth and more equitable regions. The first step in improving pathways of opportunity for Long Beach residents is to obtain a complete picture of our strengths and challenges.

An economic equity profile is essential to the “Everyone In” economic inclusion initiative. By obtaining disaggregated data on Long Beach, we can better understand the challenges facing our community, and will be better equipped to develop solutions, track
progress, and move the needle toward a more prosperous economy where everyone can participate and reach their full potential.

**Fiscal Impact**

There is no significant fiscal impact for this requested report.

Subject: Status Update – Economic Equity Profile Study

On November 7, 2017, the City Council directed the City Manager, through the Office of Equity, to identify a philanthropic or educational partner to conduct an economic equity study for the City of Long Beach (City) and report back in 60 days.

Two such partners have been identified. The first is PolicyLink, a national research and action institute advancing racial and economic equity. The second is Citi Community Development, Citi Bank’s philanthropic arm to achieve financial inclusion and economic empowerment for underserved individuals, families, and communities, which will fund PolicyLink’s development of an equitable growth profile for the City. The creation of the Office of Equity, the 10-Year Blueprint for Economic Development, and the “Everyone In” economic inclusion initiative demonstrated to PolicyLink and Citi Community Development that the City, and broader stakeholder community, are committed and able to take action towards a more equitable Long Beach.

While the elements of the Long Beach profile will be consistent with other equitable growth profiles that PolicyLink has developed (e.g., Fairfax County, Long Island, and New Orleans), the data indicators will vary based on stakeholder input from the “Everyone In Listening Tour.” The profile will also include policy recommendations derived from data analysis, community and stakeholder engagement, and promising practices from other jurisdictions. Preliminary findings of the report will be shared at the “Everyone In Economic Equity Summit” taking place at the Long Beach Convention Center on May 17, 2018, and with the City Council.

If you have any questions, please contact Katie Balderas, Office of Equity Manager, at (562) 570-4333, or by email at Katie.Balderas@longbeach.gov.

Subject: Economic Equity Study Update

On November 7, 2017, the City Council directed the City Manager, through the Office of Equity, to identify a philanthropic or educational partner to conduct an economic equity study for the City of Long Beach (City) and report back in 60 days. As outlined in a progress update provided on April 24, 2018, Citi Community Development was identified as a source of funding and PolicyLink as the entity to develop the economic equity study. This serves as a second progress update on these efforts.

On May 17, 2018, PolicyLink provided a presentation of preliminary findings (attached) at the “Everyone in Economic Equity Summit” and the funding requirements with Citi Community Development were finalized this month. Over the course of the next several months, the Office of Equity will work with PolicyLink and a variety of community stakeholders to provide input on the goals of the study, feedback on an initial draft, and provide policy recommendations. The study is expected to be complete by the end of 2018.

If you have any questions, please contact Katie Balderas, Office of Equity Manager, at (562) 570-4333, or by email at Katie.Balderas@longbeach.gov.

Advancing Equity and Inclusive Growth in Long Beach

‘Everyone In’ Economic Equity Summit

May 17, 2018
Mary M. Lee
Deputy Director, PolicyLink

What Is Equity?

Equity is just and fair inclusion into a society in which all can participate, prosper, and reach their full potential.

Attaining equity requires eliminating barriers and providing people with the optimal opportunity to thrive.

Source: Center for Story-Based Strategy and the Interaction Institute for Social Change. cittamuse.com

What Is An Equitable City?

Cities are equitable when all residents — regardless of their race/ethnicity, gender, income, neighborhood of residence, or other characteristics — are fully able to participate in the city’s economic vitality, contribute to the city’s readiness for the future, and connect to the region’s assets and resources.

“As an economist, I worry that these inequities pose a serious threat to future economic growth... As people of color become a majority of the population, the failure to end their economic exclusion means a failure of the American economy.”

—Larry Summers, All-In Nation
**Profile Uses**
- Catalyze conversations
- Build a shared narrative
- Inform priorities
- Forge partnerships
- Prompt policy action

**Equity Indicators Framework**

<table>
<thead>
<tr>
<th>Demographics</th>
<th>Who lives in the region and how is this changing?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economic Vitality</td>
<td>Can all residents participate in and contribute to economic vitality?</td>
</tr>
<tr>
<td>Readiness</td>
<td>Is the workforce prepared for the 21st century economy?</td>
</tr>
<tr>
<td>Connectedness</td>
<td>Are residents connected to each other and the region's assets and opportunities?</td>
</tr>
<tr>
<td>Economic Benefits</td>
<td>What are the benefits of racial economic inclusion to the broader economy?</td>
</tr>
</tbody>
</table>

**How is Long Beach Doing?**

**DEMOGRAPHICS**

- Who lives in the region and how is this changing?
**DEMographics**

From 1980-2010, people of color went from 32.3% to 70.6% of the population.

---

**DEMOGRAPHICS**

Latinos and other communities of color are the fastest-growing groups in Long Beach

---

**Economic Vitality**

- Demographics
  - Who lives in the region and how is this changing?

- Economic Vitality
  - Can all residents participate in and contribute to economic vitality?

- Readiness
  - Is the workforce prepared for the 21st century economy?

- Connectedness
  - Are residents connected to each other and the region's assets and opportunities?

- Economic Benefits
  - What are the benefits of racial economic inclusion to the broader economy?

---

**Economic Vitality**

22 percent of Latino adults ages 25 to 64 were working full-time and living below 200% of the poverty level

---

PolicyLink and PERE National Equity Atlas, www.nationalequityatlas.org
ECONOMIC VITALITY

Black and Mixed Race/Other population had the highest unemployment rate at 12 percent

<tr>
<td>Mixed</td>
<td>38%</td>
</tr>
</tbody>
</table>
Among 16-24 year-olds, the Black population had the highest share of disconnected youth.

Rent burdens in Long Beach are significant, particularly for Blacks and Latinos.

Car access is more limited in the northeast section of the city.
**ECONOMIC BENEFITS**

- Demographics
  - Who lives in the region and how is this changing?
- Economic Vitality
  - Can all residents participate in and contribute to economic vitality?
- Readiness
  - Is the workforce prepared for the 21st century economy?
- Connectedness
  - Are residents connected to each other and the region's assets and opportunities?
- Economic Benefits
  - What are the benefits of racial economic inclusion to the broader economy?
