

# LONG BEACH CUPA

Department of Health  
and Human Services

## **Legislative Requirements:**

There are minimum hazardous material inventory reporting and data management requirements in Chapter 6.95 of Division 20 of the California Health and Safety Code, and Section 11022 of Title 42 of the United States Code (1989) and local laws. These regulations require businesses within Long Beach CUPA's jurisdiction to complete a chemical inventory to disclose hazardous materials stored, used, or handled on site. This disclosure information will assist emergency responders in planning for and handling emergencies involving hazardous materials. The main program objectives include the safety of emergency responders, the public, and the environment.

Chapter 6.95 of the California Health and Safety Code also requires a Hazardous Materials Business Emergency Plan (HMBEP). The intent of the HMBEP is to assist in mitigating a release or threatened release of a hazardous material, and to minimize any potential harm or damage to human health or the environment

The Long Beach CUPA is required to maintain on file the following components of the business plan: Business Activities Form, Business Owner/Operator Identification, Chemical Inventory and a Site Plan. **Business owners are responsible to maintain the completed business plan on site.** HMBEP's shall be made available for inspection and/or in the event of an emergency.

In accordance with the provisions of Chapter 6.95, disclosure of hazardous materials shall be updated at least annually, or when specific changes have occurred.
