

Veterinary Disease Reporting System (VDRS)

VDRS allows the Long Beach Health Department to detect outbreaks in the veterinary community by providing a centralized online reporting system and reporting results back out to Long Beach veterinarians.

Reportable Diseases in VDRS

- Canine Leptospirosis
- Canine/Cat Influenza
- Canine Parvovirus
- Feline Panleukopenia
- Heartworm
- Giardia
- Distemper
- Coccidioidomycosis
- Outbreak or Antibiotic Resistance
- Other Diseases
- Syndromic Report

Report these diseases online weekly:
