**Expedited Plan Check Service**

Information  
Bulletin  
**BU-003**  
Eff: 01-23-2008  
Rev: 05-18-2017

While all construction plans are processed as quickly as possible, Expedited Plan Check is an alternative plan review service that accelerates the normal plan review process. With the Expedited Plan Check service, projects are assigned to plan check staff within five working days of project submittal, and the average time to process plan check is reduced by approximately fifty percent (50%). In addition, an appointment with the plan check staff can be made within five working days after the initial plan review comments have been released and comments have been addressed.

To request this service, please mark "Expedited" on the Development Permit Application at the time the construction document(s) is/are submitted to the Development Permit Center (DPC) for review. Construction documents will be screened for completeness and the appropriate fees will be collected (Long Beach Municipal Code §18.06.020.G). Depending on staffing levels, the DPC cannot guarantee that every request for Expedited Plan Check service will be granted or accommodated.

For plan review services performed by other departments or agencies, such as Long Beach Planning, Long Beach Fire (i.e, CUPA, UST), Long Beach Gas, Long Beach Water, or Public Works, please contact those agencies directly for information on the types of services they provide.
