“The bicycle is not just a tool for transportation, health, fitness, and clean air, but also for community connection, youth empowerment, and societal change.”
– Mia Birk
City of Long Beach

Bicycle Master Plan

A Supplement to the Mobility Element

Prepared by the City of Long Beach Department of Development Services and Department of Public Works.

Assisted by Alta Planning + Design, Here Design Studio, Sumire Gant Consulting.

## 1 Vision
Long Beach Bicycle Master Plan Vision ......................................................... 3

## 2 Introduction
Project Purpose ................................................................................................. 7
Benefits of Bicycling ......................................................................................... 8

## 3 Existing Conditions
Local Context ...................................................................................................... 13
State of Bicycling in Long Beach ...................................................................... 20

## 4 Community Input
What we Heard .................................................................................................. 39
Community Outreach Strategy .......................................................................... 40
Survey Results .................................................................................................... 41
Non-Traditional Workshops .............................................................................. 44
Focus Groups ..................................................................................................... 46

## 5 Goals, Strategies, & Policies
Overview ............................................................................................................. 51
Goals, Strategies, & Policies .............................................................................. 52

## 6 Implementation
Infrastructure Recommendations ...................................................................... 62
Bikeway Project Phasing ................................................................................... 62
Network Spot Improvements .......................................................................... 74
Bicycle Support Facilities ................................................................................. 78
Non-Infrastructure Bicycle Programs ................................................................. 80
Implementation Measures .................................................................................. 80

## 7 Administration & Funding
Overview ............................................................................................................. 85
Complete Streets Assessment ........................................................................... 85
CEQA .................................................................................................................. 85
ATP Compliance ................................................................................................. 85
Cost Estimates ................................................................................................... 86
Sources of Potential Funding ............................................................................. 88

## Appendix
A: Bicycle Facility Design Guidelines
B: Existing Plans and Policies Review
C: Additional Existing Conditions Data
D: Detailed Survey and Outreach Results
E: Unit Cost Assumptions for Bicycle Facilities
F: Priority Project Summary Sheets
G: Roster of Potential Non-Infrastructure Programs
H: ATP Compliance Checklist
I: Resolution of Plan Adoption
J: Equity Analysis
K: Vision Network
