

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Recreational UAS Weights - Sampling

Name	Weight	Camera?	Example Images	Would Require Registration?
TSQ Heli Max	1.1 oz.	N		<p>WOULD NOT REQUIRE REGISTRATION UNDER RULE</p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
Air Hogs Helix X4 Stunt	1.8 oz.	N		<p>WOULD NOT REQUIRE REGISTRATION UNDER RULE</p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
UDI Discovery	4.6 oz.	Y		<p>WOULD NOT REQUIRE REGISTRATION UNDER RULE</p>

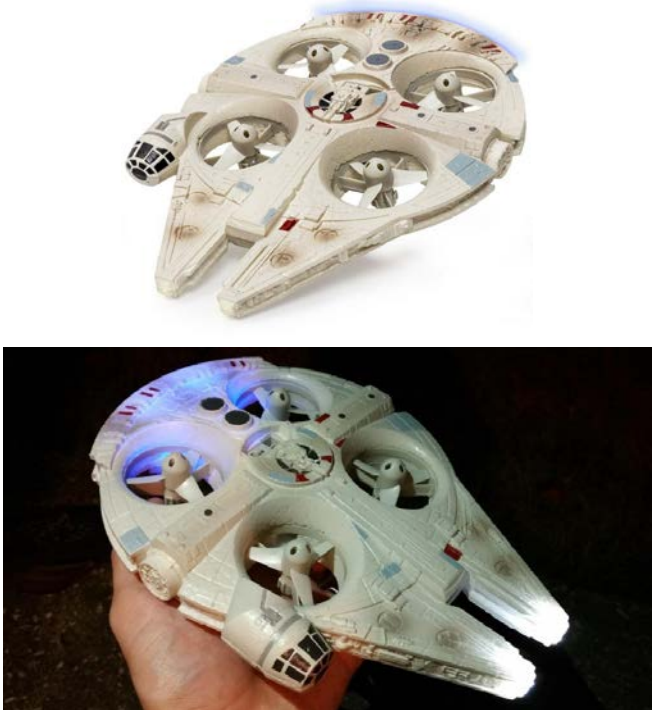

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
Hubsan X4	1.7 oz.	Y		<p>WOULD NOT REQUIRE REGISTRATION UNDER RULE</p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
Sky Viper	4.7 oz.	Y		<p>WOULD NOT REQUIRE REGISTRATION UNDER RULE</p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
Air Hogs Millennium Falcon	2.2 oz.	N		<p>WOULD NOT REQUIRE REGISTRATION UNDER RULE</p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
Extreme Flyers MicroDrone 2.0	1.2 oz.	N (optional)		WOULD NOT REQUIRE REGISTRATION UNDER RULE

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera?	Example Images	Would Require Registration?
Parrot Bebop	14.6 oz.	Y		<p style="text-align: center;"><u>WOULD</u> REQUIRE REGISTRATION UNDER RULE</p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera ?	Example Images	Would Require Registration?
<p>3D Robotics (3DR) Solo</p>	<p>3 lbs, 7.1 oz (without camera)</p>	<p>Optional Go Pro</p>		<p><u>WOULD REQUIRE REGISTRATION UNDER RULE</u></p>

The following list of unmanned aircraft weights is provided as guidance. The weights for each unmanned aircraft listed have been provided by manufacturers and vendors, and have not been independently verified by the FAA. The listed weights do not include the weight of a camera, sensor, battery or other device that may be added to the aircraft as an option, thereby increasing the aircraft's weight. The listed weights do not include the weight of controllers and other equipment that remain on the ground during operation and therefore are not a part of the aircraft. The inclusion of an unmanned aircraft on this list is not an endorsement of that aircraft by the FAA. Each owner of an unmanned aircraft is responsible for complying with the registration requirements that apply to that aircraft.

Name	Weight	Camera ?	Example Images	Would Require Registration?
<p>DJI Phantom 3 Standard</p>	<p>2 lbs, 11.4oz</p>	<p>Y</p>		<p><u>WOULD</u> REQUIRE REGISTRATION UNDER RULE</p>
