

Signal Hill HVAC Overhaul

2321 Stanley Ave.
Signal Hill, CA

PROJECT SUMMARY

The Signal Hill HVAC Overhaul project will provide updates to the existing HVAC system, which serves as a transmitter site owned by the City of Long Beach, and located at the top of Signal Hill. The project involves replacing major components of the system such as the condenser units and air handlers, while leaving duct work in place.

Community Benefits:

- Reduce maintenance costs
- Continue reliability of City of Long Beach radio communications network
