

JOIN COMMUNITY SOLAR TODAY!

What is it?

Southern California Edison's (SCE's) Community Renewables Program provides the benefits of solar without the need to install panels on individual properties, making it a great option for renters and homeowners.

How does it work?

Solar energy is generated on farms and sent to the electricity grid to be purchased by utility providers. You subscribe to a share of this electricity and receive a credit directly applied to your utility bill. You pay only 90% of the value of the bill credits, resulting in **savings of up to 10%**.

Program Benefits:

- ✓ Save Money
- ✓ No Solar Installation
- ✓ Invest in Clean Energy

WHAT IS IT?

Community solar is supported by the State's Community Renewables Program carried out by Southern California Edison (SCE). The program aims to provide the benefits of renewable energy without the need to install solar panels on individual properties, making it a great option for renters and homeowners.

HOW DOES IT WORK?

Solar energy is generated on farms and sent to the electricity grid to be purchased by utility providers. You subscribe to a share of this electricity and receive a credit directly applied to your SCE utility bill. You pay only 90% of the value of the bill credits, resulting in **savings of up to 10%**.

BENEFITS

- **Save money on your utility bill**
Receive credits as the solar project generates power. Customers pay 90% of the value of the credit, resulting in about a 10% saving on your electricity bill.
- **Get solar without the hassle**
No installation of solar panels or equipment on your home is required. Your home still receives electricity from your utility company, making the switch seamless!
- **Invest in local, clean energy**
Support local renewable energy jobs and projects. Help strengthen Long Beach's resilience to the impacts of climate change.

WHY IT MATTERS

By joining community solar, you are helping us achieve our Long Beach Climate Action Plan (LB CAP) greenhouse gas emission reduction goals!

Learn more about the LB CAP:
