Blood Lead Level:	mcg/dL	Test Date:	Draw Type:

Iron-deficiency anemia assessment completed: ☐ Yes ☐ No
Parent contacted for repeat lead level: ☐ Yes ☐ No
Next scheduled appointment for repeat blood level draw: **
** *Follow-up testing by venous blood draw recommended.*

COMMENTS

Once a referral is submitted, CLPPP will assess need for follow-up and provide recommendations.

- **3.5 mcg/dl - 9.4 mcg/dl** (Capillary or venous) — a letter will be sent to encourage follow-up screening. A Health Educator (HE) may also contact the parent/guardian to provide education to prevent lead exposure. Provider should schedule patient for follow-up venous blood draw according to state guidelines.
- **Venous blood lead levels of 9.5 mcg/dl or greater** — Public Health Nurse (PHN) will follow-up with patient to provide nursing assessment, education, and recommendations. PHN will also coordinate with Registered Environmental Health Specialist for home assessment and remediation if necessary.
