Covina, CA 91723

**Subject: Invitation to Begin Assembly Bill (AB) 52 Consultation for the Cal Water Well and Water Treatment Plant Project, City of Long Beach, California.**

Dear Mr. Salas,

The City of Long Beach (City) is requesting the initiation of AB 52 consultation on the Cal Water Well and Water Treatment Plant Project (project) located at 6157 Long Beach Boulevard. Please consider this letter and preliminary project information as the initiation of the AB 52 consultation under California Environmental Quality Act (CEQA).

### **Project Description**

The project Applicant, California Water Service Company (Cal Water), provides water utility services for most of the City of Carson and portions of Long Beach, Torrance, Compton, and unincorporated areas of Los Angeles County. To meet customers' needs, Cal Water uses a combination of local groundwater and surface water purchased from the Metropolitan Water District of Southern California (MWD), which is imported from the Colorado River and the State Water Project (SWP) in northern California. Cal Water's Dominguez District, which includes the project site, currently encompasses 374 miles of pipeline, 9 active wells, 12 storage tanks, and 7 MWD connections.

The project proposes to construct a water well and water treatment plant on-site and install water main improvements in adjacent roadway right-of-way to increase the reliability of supply to the northern portion of the Dominguez District service area. The water well is proposed to be located along the eastern end of the project site and will be approximately 1,010 feet deep with a 16-inch diameter steel casing. The well collection main will be approximately 1,950 feet total in length and the water distribution main will be approximately 2,520 feet total in length. Both the collection and distribution mains would be ductile iron pipelines installed underground in the public right-of-way with average depths of approximately four to five feet below ground surface.

The water well and water treatment plant would allow utilization of groundwater (via unused groundwater rights) to offset water purchased from MWD. As such, the project would result in a lower overall cost to Cal Water customers. Additionally, utilizing

Assembly Bill (AB) 52 Consultation  
6157 Long Beach Blvd  
4/13/2021

groundwater would enhance local supply reliability and reduce reliance on purchased water sources that are subject to curtailment or interruption. Specifically, SWP water is subject to cutbacks in response to available snowpack in northern California on a year-to-year basis. SWP water supply may also become completely unavailable should a major disaster compromise the aqueduct system that travels from northern to southern California. Therefore, the proposed project would maximize local groundwater supply, reduce supply variability during dry years, and provide water availability for fire and essential services in the event of a major disaster.

The City is preparing an Initial Study/Mitigated Negative Declaration under CEQA for the proposed project. Please see the attached figure depicting the project site.

You are a traditionally and culturally affiliated California Native American tribal representative that has requested notice of projects where AB 52 applies within the City. We are requesting any information that you may have regarding tribal cultural resources (as defined by Public Resources Code 21074) within the project area so that this information can be incorporated into the planning phase of the project. Please respond within 30 days of the date of this letter.

Your comments and concerns are important to the City and we look forward to hearing from you. I remain available to discuss any questions, comments or concerns you might have regarding the project. Due to COVID-19, the City remains closed to the public until further notice. However, I am available to schedule a teleconference to discuss if needed. Please feel free to contact me with any questions via email at [sergio.gutierrez@longbeach.gov](mailto:sergio.gutierrez@longbeach.gov), at (562) 570-5934 or you may contact the City by letter directed to:

Joseph Ontiveros  
Soboba Band of Luiseno Indians  
P.O. Box 487  
San Jacinto, CA 92581

**Subject: Invitation to Begin Assembly Bill (AB) 52 Consultation for the Cal Water Well and Water Treatment Plant Project, City of Long Beach, California.**

Dear Mr. Ontiveros,

The City of Long Beach (City) is requesting the initiation of AB 52 consultation on the Cal Water Well and Water Treatment Plant Project (project) located at 6157 Long Beach Boulevard. Please consider this letter and preliminary project information as the initiation of the AB 52 consultation under California Environmental Quality Act (CEQA).

### **Project Description**

The project Applicant, California Water Service Company (Cal Water), provides water utility services for most of the City of Carson and portions of Long Beach, Torrance, Compton, and unincorporated areas of Los Angeles County. To meet customers' needs, Cal Water uses a combination of local groundwater and surface water purchased from the Metropolitan Water District of Southern California (MWD), which is imported from the Colorado River and the State Water Project (SWP) in northern California. Cal Water's Dominguez District, which includes the project site, currently encompasses 374 miles of pipeline, 9 active wells, 12 storage tanks, and 7 MWD connections.

The project proposes to construct a water well and water treatment plant on-site and install water main improvements in adjacent roadway right-of-way to increase the reliability of supply to the northern portion of the Dominguez District service area. The water well is proposed to be located along the eastern end of the project site and will be approximately 1,010 feet deep with a 16-inch diameter steel casing. The well collection main will be approximately 1,950 feet total in length and the water distribution main will be approximately 2,520 feet total in length. Both the collection and distribution mains would be ductile iron pipelines installed underground in the public right-of-way with average depths of approximately four to five feet below ground surface.

The water well and water treatment plant would allow utilization of groundwater (via unused groundwater rights) to offset water purchased from MWD. As such, the project would result in a lower overall cost to Cal Water customers. Additionally, utilizing

Assembly Bill (AB) 52 Consultation  
6157 Long Beach Blvd  
4/13/2021

groundwater would enhance local supply reliability and reduce reliance on purchased water sources that are subject to curtailment or interruption. Specifically, SWP water is subject to cutbacks in response to available snowpack in northern California on a year-to-year basis. SWP water supply may also become completely unavailable should a major disaster compromise the aqueduct system that travels from northern to southern California. Therefore, the proposed project would maximize local groundwater supply, reduce supply variability during dry years, and provide water availability for fire and essential services in the event of a major disaster.

The City is preparing an Initial Study/Mitigated Negative Declaration under CEQA for the proposed project. Please see the attached figure depicting the project site.

You are a traditionally and culturally affiliated California Native American tribal representative that has requested notice of projects where AB 52 applies within the City. We are requesting any information that you may have regarding tribal cultural resources (as defined by Public Resources Code 21074) within the project area so that this information can be incorporated into the planning phase of the project. Please respond within 30 days of the date of this letter.

Your comments and concerns are important to the City and we look forward to hearing from you. I remain available to discuss any questions, comments or concerns you might have regarding the project. Due to COVID-19, the City remains closed to the public until further notice. However, I am available to schedule a teleconference to discuss if needed. **Subject: Invitation to Begin Assembly Bill (AB) 52 Consultation for the Cal Water Well and Water Treatment Plant Project, City of Long Beach, California.**

Dear Mr. Mirelez,

The City of Long Beach (City) is requesting the initiation of AB 52 consultation on the Cal Water Well and Water Treatment Plant Project (project) located at 6157 Long Beach Boulevard. Please consider this letter and preliminary project information as the initiation of the AB 52 consultation under California Environmental Quality Act (CEQA).

### **Project Description**

The project Applicant, California Water Service Company (Cal Water), provides water utility services for most of the City of Carson and portions of Long Beach, Torrance, Compton, and unincorporated areas of Los Angeles County. To meet customers' needs, Cal Water uses a combination of local groundwater and surface water purchased from the Metropolitan Water District of Southern California (MWD), which is imported from the Colorado River and the State Water Project (SWP) in northern California. Cal Water's Dominguez District, which includes the project site, currently encompasses 374 miles of pipeline, 9 active wells, 12 storage tanks, and 7 MWD connections.

The project proposes to construct a water well and water treatment plant on-site and install water main improvements in adjacent roadway right-of-way to increase the reliability of supply to the northern portion of the Dominguez District service area. The water well is proposed to be located along the eastern end of the project site and will be approximately 1,010 feet deep with a 16-inch diameter steel casing. The well collection main will be approximately 1,950 feet total in length and the water distribution main will be approximately 2,520 feet total in length. Both the collection and distribution mains would be ductile iron pipelines installed underground in the public right-of-way with average depths of approximately four to five feet below ground surface.

The water well and water treatment plant would allow utilization of groundwater (via unused groundwater rights) to offset water purchased from MWD. As such, the project would result in a lower overall cost to Cal Water customers. Additionally, utilizing

groundwater would enhance local supply reliability and reduce reliance on purchased water sources that are subject to curtailment or interruption. Specifically, SWP water is subject to cutbacks in response to available snowpack in northern California on a year-to-year basis. SWP water supply may also become completely unavailable should a major disaster compromise the aqueduct system that travels from northern to southern California. Therefore, the proposed project would maximize local groundwater supply, reduce supply variability during dry years, and provide water availability for fire and essential services in the event of a major disaster.

The City is preparing an Initial Study/Mitigated Negative Declaration under CEQA for the proposed project. Please see the attached figure depicting the project site.

You are a traditionally and culturally affiliated California Native American tribal representative that has requested notice of projects where AB 52 applies within the City. We are requesting any information that you may have regarding tribal cultural resources (as defined by Public Resources Code 21074) within the project area so that this information can be incorporated into the planning phase of the project. Please respond within 30 days of the date of this letter.

Your comments and concerns are important to the City and we look forward to hearing from you. I remain available to discuss any questions, comments or concerns you might have regarding the project. Due to COVID-19, the City remains closed to the public until further notice. However, I am available to schedule a teleconference to discuss if needed. Please feel free to contact me with any questions via email at [sergio.gutierrez@longbeach.gov](mailto:sergio.gutierrez@longbeach.gov), at (562) 570-5934 or you may contact the City by letter directed to:
