Health Department Announces Regular Monitoring of Recreational Water Samples

Health Department Director Anissa Davis announces regular monitoring of recreational water samples, which will begin on April 1, 2021. This monitoring will be conducted to ensure the safety of the public while participating in recreational activities in city parks, beaches, and other public water bodies.

“Regular monitoring of recreational water samples is an important step in protecting the health and safety of the public,” said Davis. “This monitoring will help us identify any potential health hazards and take appropriate action to ensure that our water bodies are safe for use.”

The Health Department will conduct these samples at least once a month, and the results will be posted on the city’s website. The public is encouraged to report any concerns or incidents to the Health Department.

For more information, please visit the city’s website at www.longbeach.gov/health/inspections-and-reporting/inspections/recreational-water-samples/

If you have any questions or concerns, please contact the Health Department at 562-570-4199 or jic@longbeach.gov.
