Friday, August 28, 2020
Mayor Robert Garcia (Judeth Luong) City of Long Beach
Office of the Mayor, 562.570.4104, Judeth.Luong@longbeach.gov

Long Beach resident

Citywide Mosquito Control

Statement of Concern: Severe Weather and Nutrient Dynamics

The climate of Long Beach, CA - specifically the micro-climate in the city's downtown area - is conducive to the breeding of mosquito populations. Mayor Judeth Luong (Dr. Anissa Davis) and other health officials (Dr. Anissa Davis) note that the increased growth of mosquito populations in recent months has resulted in a higher risk of West Nile Virus and other mosquito-borne illnesses.

To address this concern, the City of Long Beach has developed a comprehensive plan to control mosquito populations and reduce the risk of disease transmission. The plan includes:

1. Regular spraying of mosquito-repellent products
2. Distribution of free mosquito nets
3. Education campaigns on the importance of mosquito control
4. Increased inspections of public spaces
5. Enhanced monitoring of mosquito activity

The City of Long Beach is committed to protecting the health of its residents and is taking all necessary steps to ensure the safety of the community.

For more information on the City's mosquito control efforts, please visit longbeach.gov/mosquitoes or call 1.877.WNV.BIRD.

West Nile Virus information can be found at westnile.ca.gov.
