# 1 The Opportunity

The Long Beach Smart City Challenge enables City Departments to collaborate with technology companies to address ongoing civic problems. By utilizing pilot projects, City staff have the opportunity to quickly understand emerging technologies, how we might adopt them, and leverage partnerships to drive innovative service delivery for our residents, in alignment with our Smart City Strategy.

## 1.1 Challenge Statement

[Challenge statement].

## 1.2 Objectives

[List and describe at least one but no more than three goals or outcomes that define for Proposers what it looks like to successfully address your challenge. Additional guidance and examples are available in the [GPL RFP Guidebook \(page 27\)](#).]

## 1.3 Project Background

[Concisely explain the project, including additional project details or background information that would be required for vendors to understand our needs and develop relevant proposals.]

## 1.4 Award Terms

This contract will be for a period of six months. Pilot projects that successfully achieve the project goals and meet its key performance indicators may be sustained or scaled. The decision to sustain or scale a project requires mutual agreement between the City and the Awarded Contractor, and is conditional on factors such as funding availability, City need, and market conditions. If the City elects to sustain or scale the project through contract amendment, the total contract term will not exceed five years. The City may also elect to sustain or scale the project by issuing a new solicitation.

## 1.5 Performance Metrics & Contract Management

### 1.5.1 Performance Metrics

The table below highlights the targets that will be tracked and reviewed collaboratively with the Awarded Contractor during the contract. This list is an indication of the performance metrics of interest to the City, and is not exhaustive or final. As a part of a response to this RFP, Proposers may propose additional or alternative performance metrics to be tracked on a regular basis. The final set of performance metrics and frequency of collection will be negotiated by the successful Proposer and the City prior to the finalization of an agreement between parties, and may be adjusted over time as needed.

List at least one metric per objective defined in Section 1.2, but no more than five total metrics to be measured during the pilot. If relevant, list the data to be provided by the

Contractor to help monitor performance against the metrics below. This may include when data should be delivered, how frequently, and in what format (e.g., performance reports). It may also include any specific data cuts required to highlight relevant demographic, performance, or service data.

METRIC	DESCRIPTION	TARGET	DATA SOURCE
1. [#1 outcome / output expected from the contract]	[Provide an additional description of what this metric is or why it is important]	[List any specific targets or standards for this metric that the Contractor will be expected to meet.]	[If relevant, note the data source or reporting channel that will be used to evaluate this metric.]
2. [Repeat the above for as many outcome / output metrics are required]			
3.			

### 1.5.2 Contract Management

**Communication and Management:** Implementation of the contract is a partnership between the City and the Awarded Contractor (known as the “pilot team”). The City and the Awarded Contractor will meet monthly, at a minimum, during the active pilot period. Pilot teams can meet more regularly as needed; this is recommended during the implementation and performance evaluation stages of the program.

**Contract Payment:** The City of Long Beach does not offer financial compensation for companies during the six-month Smart City Challenge pilot process.

If the City chooses to sustain or scale the contract beyond the Smart City Challenge pilot duration, the City issues payment based upon services rendered. After a contract amendment is finalized and work is performed, the Contractor should invoice the City. The City will remit payment within 30 calendar days of being billed.

## 2 How We Choose

### 2.1 Minimum Qualifications

[Minimum requirements should be carefully selected as they can narrow the pool of eligible Proposers, thereby limiting competition for the procurement. If applicable, list the minimum requirements Proposers must meet to be eligible, such as:

- Qualification to conduct business in the City
- Not having been debarred by Federal, State or local government

- Mandatory experience (necessary minimum experience or references)
- Mandatory licenses types]

## 2.2 Evaluation Criteria

The Smart City Challenge evaluation and selection process is aligned with the City's procurement principles and ensures that selected ideas are aligned with Citywide and Departmental priorities. Given the variety, all submitted vendor proposals will be evaluated on the same criteria. The criteria include *qualifications, impact, data governance, originality, feasibility*, and the ability to *demonstrate understanding of the challenge*.

In the event of any conflict or contradiction between or among these documents, the documents shall control in the following order of precedence: the final executed contract, the RFP, any modifications and clarifications to the Awarded Contractor's proposal, and the Awarded Contractor's proposal. 3. The Long Beach Municipal Code (LBMC) requires all businesses operating in the City of Long Beach to pay a business license tax. In some cases, the City may require a regulatory permit and/or evidence of a State or Federal license. No finding or judgment of negligence, fault, breach, or the like on the part of Awarded Contractor shall be required for the duty to defend to arise. City shall notify Awarded Contractor of any Claim, shall tender the defense of the Claim to Awarded Contractor, and shall assist Awarded Contractor, as may be reasonably requested, in the defense.

8. Any requests for reasonable price adjustments must be submitted 60 days prior to the Contract annual anniversary date. Requests for adjustment in cost of labor

and/or materials must be justified based upon verifiable criteria such as the Consumer Price Index, US City Averages, or other relevant indices.

9. If the Awarded Contractor elects to use subcontractors, Awarded Contractor agrees to require its subcontractors to indemnify Indemnified Parties and to provide insurance coverage to the same extent as Awarded Contractor.

If there is a difference between the general prevailing wage rates determined by the director of the Department of Industrial Relations and the applicable minimum wage rates determined by the Secretary of Labor (for federally assisted projects) for similar classifications of work, the Contractor and its subcontractors of every tier shall pay their workers not less than the higher wage rate.
