

City of Long Beach Office of Sustainability

GIS Support Intern

Description

The City of Long Beach Office of Sustainability works to create a more sustainable community by engaging with individuals, neighborhoods and government to reduce our impact on the environment and protect our local natural resources. Long Beach Sustainability reports to the City Manager's Office and supports the Sustainable City Commission, an advisory body to City Council.

Join our team as the GIS Support Intern. Improve your skills with GIS and add projects to your portfolio that support sustainability in Long Beach. Several Sustainability programs use GIS support, including Urban Agriculture Incentive Zones, Tree Planting, Green Business, and others. Other projects support the development of strategies and programs to create a more sustainable Long Beach.

Responsibilities

- Work with the Sustainability Coordinator to complete GIS projects as directed. Projects planned for Spring 2022 include:
 - Urban forest and watersheds mapping and analysis
- Analyze GIS data to provide reports for programs as needed.

Requirements

- At least junior standing with a GPA of 3.0 or higher
- Pursuing a degree in a related field (Geography, Environmental Science/Policy, Public Administration/Policy etc.)
- Available to work a minimum of 10 hours per week during regular M-F 9-5 work schedule
- Familiar with GIS software and data analysis

How to Apply

Send your resume, letter of recommendation, and cover letter to sustainability@longbeach.gov by January 31, 2022.

This is an unpaid internship and can be used for college credit. Interns will enjoy flexible schedules & work remotely or in downtown Long Beach.
